

MICHAEL KHALAF

front-end developer

I am a self-taught person. I have been working as a freelancer for 2 years in the field of developing and creating websites. I am a student who is exempt from conscription because I do not have a brother That is why I am ready to work from now, if there is an opportunity

Work Experience

calculate and succeed (April 2023):

This site is considered a very sophisticated calculator for calculating all kinds of numerical analysis issues that need very many steps and time

I used HTML5, CSS3, bootstrap5, javascript, aos.js, and math.js.

https://github.com/MichaelkhalafG/calculate_and_succeed

Michael Khalaf portfolio (January 2022):

I used HTML5, CSS3, bootstrap5, javascript, jquery, aos.js, swiper.js, PHP, and SQL.

<https://github.com/MichaelkhalafG/myPortfolio>

M FOR GAMES e-commerce website (June 2022):

This was the final project for the Python web course from ITI. I used HTML5, CSS3, bootstrap5, javascript, jquery, aos.js,swiper.js, and react.js.

fara7na mobile application (Feb 2022):

I made this application for a wedding organizer.

I use Flutter, dart, firebase, SQL lite, flutter packages, and Getx

<https://github.com/MichaelkhalafG/fara7na>
